

FELLOWSHIP OF ASSOCIATES OF MEDICAL EVANGELISM

Greetings, as we celebrate the birth of our Saviour during this reflective time of year.

We at **FAME Canada** are connecting with you again to ask for your prayerful and financial support to carry out initiatives planned for the coming year

-Three exploratory working visits by the following medical doctors and their spouses.

Dr. David and Heather Reid to Dominican Republic

Dr. Garth and Andrea Slysz to Haiti

Dr. Don and Kathy Neily to Guatemala – In this, their first time working with FAME, the Neilys will be returning to Tactic, Guatemala and the Kekchi and Poqomchi people groups, to work alongside the Impact Ministries team there. They will search for opportunities for partnership between Fame and Impact Ministries within their growing medical work in this impoverished area of the world.

The purpose of the trips is to develop long term working relationships with new partners on the ground, through our short term mission program. It is imperative to have the necessary trust and knowledge to successfully launch a drug partnership program in any given region.

FAME Canada's drug partnership program sees drugs shipped directly to third world countries from the IDA Foundation in Holland, at 1/9th the cost of prices in Canada. Plans for 2016 include:

- Provision of \$10,000 to purchase medicines in partnership with Lifeline Christian Mission in Haiti.

-Two drug packs to accompany Dr. Don Neily on his working visit to Guatemala

-Two drug packs to accompany Dr. David Reid on his working visit to Dominican Republic

The total cost of all these initiatives for the upcoming year is \$25,000. Receipts will be issued for all donations, which may be mailed to the address below.

FAME Canada, 503 University Avenue, Charlottetown, PE C1A 7Z4

Our hopes are that you will consider helping FAME Canada reach this goal; as we actively search for more opportunities to share the love of Christ with the world.

Sincerely,

James Nicholson on behalf of FAME Canada

FAME is dedicated to bringing help and hope to people in underdeveloped nations through medical evangelism with special concern for least reached people.
